## HARVEST DATE

Warm growing conditions throughout the summer came to an abrupt end the last week of September when the valley was hit by a major storm that brought rain and cooler temperatures. Anderson Family Vineyard fruit preserved its integrity despite the heavy rains and optimal botrytis conditions. Because the fruit remained in such pristine condition, we let it hang for well over a week after the rains stopped. We picked on October 10<sup>th</sup> and were rewarded with mature, clean, flavorful fruit. Yields at harvest were 1.5 tons per acre.
